

WORKING TOGETHER FOR CLEAN AIR

Airsheds monitor,
analyze and report
air quality data

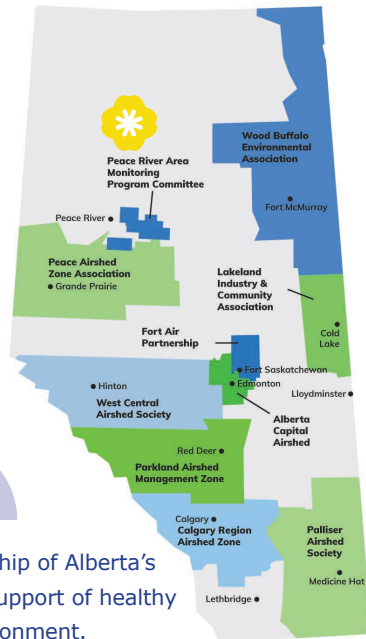

Airsheds are not-for-profit,
consensus-based, regional
multi-stakeholder organizations

Airsheds support actions to
improve air quality within
specific geographic areas

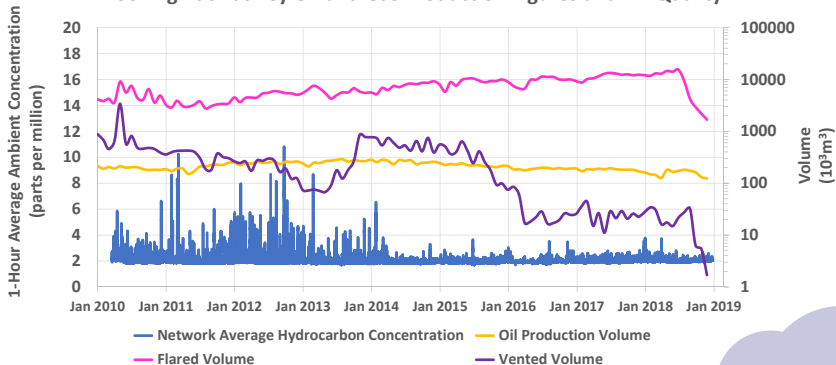

ALBERTA AIRSHEDS
COUNCIL

Alberta Airsheds Council is a partnership of Alberta's Airsheds and provides leadership in support of healthy air quality for Albertans and the environment.

A Historical Perspective of the PRAMP Airshed:

Looking Back at Key Oil and Gas Production Figures and Air Quality

pramp
PEACE RIVER AREA MONITORING PROGRAM

While oil production has declined slightly since 2010, production controls have resulted in a dramatic decline in hydrocarbon emissions, as well as flaring and venting volumes. Looking at these elements together highlights the significant improvements in air quality in the Peace River area and in some cases, the products that were previously vented or flared, are now recovered for use in the energy production process.
